

Dear Colleague

It is my pleasure to draw your attention to the upcoming **15th European Vacuum Congress EVC-15**, which will be held in Geneva from June 17- 22, 2018 at the International Conference Center CICG. Specific information is available at the conference's website www.evc15.org. The scientific programme will cover the following topical aspects:

Applied Surface Science
Biointerfaces
Electronic Materials and Processing
Nanotechnology
Plasma Science and Technique
Surface Science and Engineering
Thin Films and Coatings
Vacuum Science and Technology
Vacuum in Accelerators

You are cordially invited to take advantage of this opportunity to present your most recent results and to meet colleagues from your research field. I believe, when people meet and discuss, great insights will happen. So please consider submitting abstracts to this conference at <https://www.evc15.org/abstracts.html> .

Geneva is a very attractive city due to its location at the lake, its historic center and the unique international flair. It is conveniently reachable from almost all airports around the world. The town is also host to CERN, which will be visited during the conference.

Along with my organizing fellows, I am looking forward to welcoming you in Geneva to EVC-15!

Martin Wüest
Chairman of EVC-15
